

External corner detail abutting render - Masonry

#248.22.01

- | | |
|---|--|
| 1 - Plas-Pro or Timber batten at 400mm centres | 6 - Fascia boards, cut down to suit the depth required |
| 2 - Plas-Pro or Timber cross battens at 600mm centres | 7 - Durafix 35mm fixing |
| 3 - Envello Board & Batten cladding board | 8 - Render stop-bead |
| 4 - 30mm Cladding board fixing | 9 - Example render detail |
| 5 - The back edge of fascia will need to be finished with touch-up coating if visible | 10 - Example masonry wall |

Note: If treated timber battens are being used, we would recommend putting a strip of DPC, joist tape or epdm on to the front of the battens
